Implementing Charts

I'm trying to add a chart into my application, can anyone help me out?

Have you tried using the Chart JS library?
Reply

mito
Yes, I tried that but I've been getting errors
Reply

Definition of what a '**Topic**' is →

```typescript
type Topic = {
    id: string;
    slug: string;
    description: string;
    createdAt: Date;
    updatedAt: Date;
}
```

Definition of what a '**Post**' is

```typescript
type Post = {
    id: string;
    title: string;
    content: string;
    userId: string;
    topicId: string;
    createdAt: Date;
    updatedAt: Date;
}
```

Definition of what a '**User**' is →

```typescript
type User = {
    id: string;
    name: string | null;
    email: string | null;
    emailVerified: Date |
        null;
    image: string | null;
}
```

Definition of what a '**Comment**' is →

```typescript
type Comment = {
    id: string;
    content: string;
    postId: string;
    userId: string;
    parentId: string | null;
    createdAt: Date;
    updatedAt: Date;
}
```

```
const topic = await db.topic.findFirst({
  where: { slug },
  include: {
    posts: {
      include: {
        user: true,
        _count: {
          select: { comments: true },
        },
      },
    },
  },
});
```

New type created to
describe the results
of this query

```
type TopicWithExtraStuff = {
    id: string;
    slug: string;
    description: string;
    createdAt: Date;
    updatedAt: Date;
    posts: {
        id: string;
        title: string;
        content: string;
        userId: string;
        topicId: string;
        user: {
            id: string;
            name: string | null;
        }
        _count: {
            comments: number
        }
    }[]
}
```
